KlenS™ - Surgical Disinfectants

Surgical disinfection serves in processing reusable medical instruments and provides increased patient safety through effective germ reduction. By reducing the amount of potentially infectious germs, the cleaning process makes the instruments much safer for the personnel. KlenS™ surgical disinfectants are not only powerful, but are also material friendly and fast acting.

KlenS™ Surgical Disinfectants is 100% Natural Product and is a water-based formulation. It consists of silver Nano particles in aqueous phase. KlenS™ Surgical Disinfectants is recommended for all surgical instruments as well as medical examination instruments. It effectively removes organic residues and prevents corrosion and discoloration of instruments. It is suitable for cleaning of all types of endodontic instruments (files, reamers) as well as general use instruments (tweezers, mirrors, scissors, forceps etc).

Key Highlights of KlenS™ Surgical Disinfectants

- It is 100% natural product free from alcohol.
- It is highly Non-flammable, devoid of harmful chemicals and volatile solvents.
- It reduces air borne pollutants.
